

# TESSELLATE™

Driven by Data. Inspired by Outcomes.

## Comprehensive Risk Adjustment and Quality Program

Creating an integrated Risk Adjustment and Quality program can be complex, but you can rely on Tessellate's experience in creating holistic approaches that demonstrate long-term benefits. We partner with you to streamline the risk adjustment and quality processes and create a customized solution that best fits your needs.

### Risk Adjustment

Tessellate understands that risk adjustment is an integral part of operations that can affect your provider network, product, and reimbursement, making the creation and execution of an annual risk adjustment strategy to improve your risk score accuracy essential. Through accuracy and improved documentation, our solutions promote accurate reimbursements and reduce RADV audit risk while enhancing the patient and provider experience. We dive deep into your member profiles, provider performance, and condition-specific analysis to tailor accurate, efficient, effective and superior outcomes.

Our innovative solution, combined with our expertise and guidance, can help you increase provider engagement, improve member contact, identify appropriate reimbursements and realize better results. Our team will work with you to build effective strategies that help develop a firm foundation for risk adjustment by employing a custom combination of elements.

### Quality

The Quality component of the Tessellate solution analyzes your current Stars and HEDIS ratings, identifies and targets areas for improvement, and implements a strategy to meet ratings goals. We also help plans new to Medicare Advantage build and implement successful strategies that lead to exceptional Star ratings from the start.

Our experience in Stars and HEDIS enables us to offer you an integrated and tailored solution aimed at improving and maintaining high Star ratings and HEDIS scores through proven strategic initiatives. Our effective strategy unites advanced analytics and comprehensive reporting to give you superior results. Our unique offering starts with analysis of your historic performance, continues with the development of a strategy accompanied by a robust suite of initiatives, and finishes with the execution of the customized initiative portfolio and continuous monitoring of overall and initiative-level performance.

This holistic and data-driven end-to-end program includes advanced analytics and comprehensive, robust reporting. This combination delivers optimized Star rating results and targeted services supporting a streamlined annual administration of HEDIS Medical Record Review (MRR) and rate generation for Medicare Advantage plans.

The most effective programs feature a fully-integrated Risk Adjustment and Quality approach to provide unmatched performance management. You can choose to add programs such as Provider Engagement Coordination and In-Home Assessments for a truly seamless solution.

#### Risk Adjustment features:

- ▶ Strategy development
- ▶ Value and cost projections
- ▶ Bid assumptions
- ▶ Initiative execution and management
- ▶ Performance management reporting
- ▶ RADV risk mitigation and audit support

#### Quality features:

- ▶ Robust predictive modeling
