

ENABLING TECHNOLOGY & ANALYTICS PLATFORM

Tessellate's Enabling Technology & Analytics Platform provides you the means to drive the overall performance and compliance of healthcare risk adjustment operations. Our Software-as-a-Service platform is built to serve the Medicare Advantage and Commercial (ACA) markets. Our integrated suite of modules provide you with the insights needed for success.

Our platform allows you to achieve greater levels of plan and provider collaboration by consolidating independent functions into a comprehensive solution. With this robust platform, you can harness the power of data to achieve your goals. Our modules go beyond the basic filter and search functionalities.

The Tessellate platform allows you to toggle between summary and detailed views; drill-down from a report result set to view detailed information; access member, claim, and provider information; and export reports into a PDF or Microsoft Excel format. Unique to the platform is your ability to search for records at the member or provider level through physician view.

The platform includes tools for Suspect Analytics, Risk Management, MA Enrollment and Financial Reconciliation. Additionally, the self-service Analytics module further enables plans and / providers by allowing for adhoc analysis, user-generated dashboards, reports and KPIs, plus data driven alerts and more.

FINANCIAL REPORTING

- Monthly revenue reconciliation report
- Financial forecast report
- Dropped HCCs report
- PCP Risk Adjustment Factor Report

WHY TESSELLATE?

At Tessellate, our goal is to help you succeed. We are a leader in the healthcare industry offering proven solutions to health plans and providers that demonstrate improved Risk Score accuracy, reduced RADV audit risk and increased Star Ratings. Regardless if you are new to Medicare Advantage or simply want to improve upon your current success, we will collaborate with you to offer technology-enabled, multiple-point services, designed to achieve your goals. Our end-to-end Risk Adjustment and Quality programs bring together every piece of the puzzle to form seamless strategies that will improve revenue integrity and lower your administrative costs. These solutions are provider-centric, less abrasive and quickly implemented. With a client-first commitment, Tessellate has an established track record of delivering value and quality, and we are proud to offer our innovative and comprehensive portfolio of services:

- Comprehensive Medicare Advantage Risk Adjustment and Quality Program
- Prospective Provider Engagement Coordination (PEC) Program
- Retrospective Medical Record Retrieval and Review
- Medicare Advantage Risk Adjustment Program
- Medicare Advantage Quality Improvement Program
- RAPS and EDPS Submissions
- In-Home Assessments
- Enabling Technology Platform

BY THE NUMBERS

- Serves more than 1 million members
- Operates in nearly 20 states and Puerto Rico
- Manages over \$5 billion in risk adjustment related revenue
- Delivers over \$300 million in quality related bonus revenue
- Achieved 4-Star rating for a national PPO plan year-over-year since 2012
